

# Expert guidance on theory and practice in condition-based intelligent machine fault diagnosis and failure prognosis.

*Intelligent Fault Diagnosis and Prognosis for Engineering Systems* gives a complete presentation of basic essentials of fault diagnosis and failure prognosis, and takes a look at the cutting-edge discipline of intelligent fault diagnosis and failure prognosis technologies for condition-based maintenance. It thoroughly details the interdisciplinary methods required to understand the physics of failure mechanisms in materials, structures, and rotating equipment, and also presents strategies to detect faults or incipient failures and predict the remaining useful life of failing components. Case studies are used throughout the book to illustrate enabling technologies.

*Intelligent Fault Diagnosis and Prognosis for Engineering Systems* offers material in a holistic and integrated approach that addresses the various interdisciplinary components of the field—from electrical, mechanical, industrial, and computer engineering to business management. This invaluable helpful book:

- Includes state-of-the-art algorithms, methodologies, and contributions from leading experts, including cost-benefit analysis tools and performance assessment techniques
- Covers theory and practice in a way that is rooted in industry research and experience
- Presents the only systematic, holistic approach to a strongly interdisciplinary topic

ISBN: 0-471-72999-X, Cloth, 456 pages, \$150.00

ISBN: 0-471-72999-X, Cloth, 456 pages, \$150.00

## Contents:

- Preface and Acknowledgements
- Prologue
- Chapter 1. Introduction
- Chapter 2. The Systems Approach to CBM/PHM
- Chapter 3. Sensors and Sensing Strategies
- Chapter 4. Signal Processing/Data Base Management
- Chapter 5. Fault Diagnosis
- Chapter 6. Fault Prognosis
- Chapter 7. Fault Diagnosis and Prognosis Performance Metrics
- Chapter 8. Logistics: Support of the System in Operation
- Appendix

## About the Authors:

**George Vachtsevanos, Ph.D.**, is Director of the Intelligent Control Systems Laboratory in the School of Electrical and Computer Engineering at Georgia Institute of Technology, in Atlanta, Georgia

**Frank L. Lewis, Ph.D.**, is Head of the Advanced Controls, Sensors, and MEMS Group in the Automation and Robotics Research Institute at The University of Texas at Arlington, in Fort Worth, Texas

**Michael Roemer, Ph.D.**, is Director of Engineering at Impact Technologies, LLC, in Rochester, New York

**Andrew Hess** is Air System PHM Lead and Development Manager in the Joint Strike Fighter Program Office at Naval Air Systems Command, in Patuxent River, Maryland

**Biqing Wu, Ph.D.**, works on various topics of active disturbance control and CBM/PHM. She is currently serving as a research engineer at the Georgia Institute of Technology, in Atlanta, Georgia

### HOW TO ORDER

**MAIL TO: Wiley Customer Care**    **CALL: 1-877-762-2974**  
 10475 Crosspoint Blvd.    **FAX: 1-800-605-2665**  
 Indianapolis, IN 46256    **E-mail: custserv@wiley.com**

### CANADA

**MAIL TO: John Wiley & Sons**    **CALL: 1-800-567-4797**  
 22 Worcester Road    **FAX: 1-800-565-6802**
